

And now I have two personal comments on the MP for the LVRT.

First, while the LAC comments discussed the complaint protocol and narrative, we didn't include a comment on the form itself. I have noticed that the form included with the current MP is out-of-date. I have attached the current form. The main difference is that it allows the complainant to choose whether they wish to receive receipts via mail or email.

So my first personal comment is that the attached form should be used. Please alert me to any difficulties with the file.

My second personal comment is that any wording in the MP that ALL landowners along the LVRT have been sent communications about the trail project needs to be verified for its accuracy. This issue has recently come to light. It has been difficult to get the Danville and Greensboro landowner addresses, and VAST/LVRTC is still working on getting those letters out. This could be acknowledged somehow...

I assume that this email suffices and that you don't need a hard copy.

Thanks,  
Chip
